

8-bit 5V Full-featured MCU with EEPROM and TSI

S08PT

Last Updated: Aug 1, 2023

The S08PT MCUs integrate key features like touch sensing interface (TSI), EEPROM, and a motor control flex timer to simplify design and to help reduce system cost. The S08P family is simple, yet powerful, and offers excellent EFT/ESD performance. This scalable and pin-compatible MCU family reuses existing S08 core, IP and tools for easy migration from existing 8-bit S08 products. Our 5V 8-bit S08P MCU family gives your designs more durability and reliability in harsh industrial and user interface environments, meeting appliance safety standard IEC60730.
